## SUSTAINABILITY MANAGEMENT AT THE HILDEBRANDT GROUP

Environmental and climate protection are indispensable, which is why changes also have to happen in companies. Nina Blöhs, who is responsible for our sustainability management, is responsible for this at the Hildebrandt Group.

She has always been interested in sustainability, both in her training at ALBA and in her business studies with a specialisation in sustainability and environmental management.

„I find the interplay of apparent opposites, such as sustainable and profit-oriented business practices, particularly exciting.“
